

Galion City Board of Health Environmental Division Monthly Report for August 2021

Food Safety

Inspections of facilities have unfortunately been delayed due to the amount of other work that is required when trying to do two job positions. Also, EH work has been delayed because of the sharp increase in Covid-19 cases this past month. All late license fees have been paid.

Public Health Nuisances

There were 8 nuisance complaints during the month of August. One concerned Covid-19 safety issues at a medical facility, one was food service operation complaint, one was a sewage complaint, one concerned pest/vermin/animal issues (armyworm), and four were solid waste complaints. Several complaints are being investigated in conjunction with the zoning inspector. Most of the complaints are now closed or referred. The current total for the year is 107.

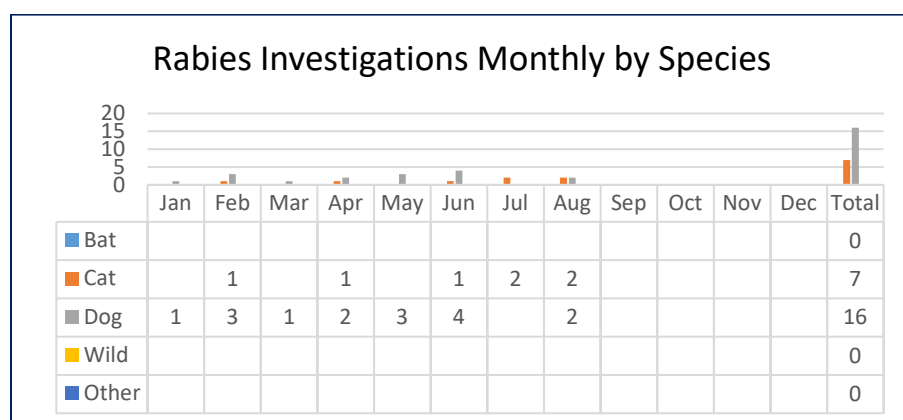

General Environmental Health

On August 20th, myself and two employees set up an outreach table for the last 3rd Friday in Galion. It was very successful with several attendees and great weather. We gave out mosquito prevention supplies, lead poisoning prevention cleaning materials, sexual health brochures, and a few Covid-19 vaccines.

Inspections were completed for a second time on all outdoor licensed pools, during the month of August.

Rabies Prevention

GCHD received 2 dog and 2 cat bite reports in the month of August. Compliance with updating the rabies vaccination requirements for these animals is being sought.

Respectfully Submitted,

Andrea Barnes, R.S.
Director of Environmental Health
