

Outreach Report
God's Little Acre Farmer's Market
August 16th, 2025

Division:

Nursing
Environmental Health

Participating Staff:

Brandi Riddlebaugh, RN
Matt Schwab, Director of Environmental Health

Anticipated Outcome: To provide health education in form of immunizations, hand washing, ticks and mosquitoes, bicycle safety.

Description of event: Every Saturday morning the God's Little Acre Farmer's Market takes place from 9am-12pm. Several local vendors attend as well a different food truck every week. The Galion City Health Department attends one Saturday a month to offer education and resources.

Location: 248 Harding Way West, Galion OH

Audience: Open to the public

of Community Members Impacted: Approximately 12 people visited GCHD's table and took resources and bicycle helmets and lights.

Outcomes of event: We were able to distribute 10 bicycle helmets and 15 bicycle lights to community members. We also distributed 3 packs of mosquito dunks and handed out educational resources on a variety of subjects.

In what ways can outreach be improved? I would have liked to have seen more parents and children participate in the Glo Germ activity and more people use the handwashing station.
