

Outreach Report
Avita Home Health and Hospice Spooktacular
October 25, 2025, 4p-6p

Division:
Nursing

Participating Staff:
Brandi Riddlebaugh, RN

Anticipated Outcome: The primary anticipated outcome of participating in the Spooktacular event was to foster positive community engagement and increase visibility of our organization in a relaxed, family-friendly setting. By participating in a festive event, we aimed to build rapport with community members, strengthen trust, and lay the groundwork for future outreach opportunities where health education and resources may be more appropriate.

Description of event: This event was sponsored by Avita Home Health and Hospice to raise funds for their hospice patients.

Location: Avita Home Health and Hospice, Galion OH

Audience: The public

of Community Members Impacted: I saw approximately 50 children and adults.

Sponsor: Avita Home Health and Hospice

Outcomes of event: During the Spooktacular event, I distributed candy and first aid kits to participating families. While no educational materials or health resources were provided, the event maintained a lighthearted and festive atmosphere. Our presence contributed to community engagement and visibility in a relaxed setting, helping to build rapport and trust with attendees in a non-clinical context.

In what ways can outreach be improved? Hopefully next year more local entities will get involved so that families will want to come back again. I think this could be a very positive event for Avita Home Health and Hospice and help raise funds for the important work that they do.
